About InclusiLearn

InclusiLearn is an inclusive learning hub designed for students with disabilities. It enables them to share life hacks, access categorized content, and connect with a supportive community.

What does InclusiLearn do?

InclusiLearn is a web application designed specifically for students with disabilities. It allows them to:

- Share practical life hacks to overcome daily challenges.
- Find and explore content categorized by topics for better visibility.
- Connect with a genuine and supportive community of individuals who understand their unique experiences.

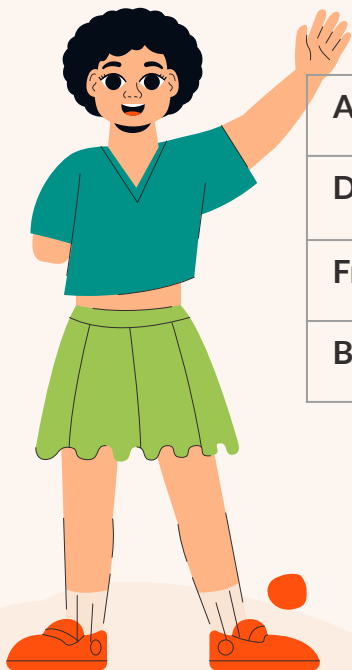

Features

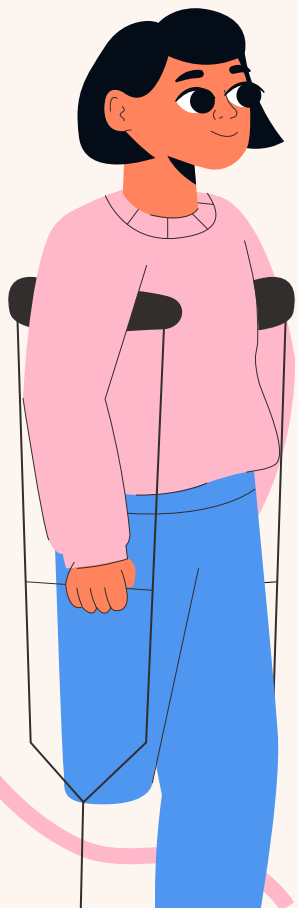

- Real-life hacks and content for practical challenges.
- Categorized content for easy navigation.
- A secure and supportive community.

How we built it?

Aspect	Tools and Technologies Used
Design	Wireframes and prototypes in Figma
Frontend	HTML, CSS, JavaScript, Bootstrap Framework
Backend	MongoDB, Express, eJS

Challenges

Throughout the development process, we encountered various challenges. These challenges pushed us to think creatively, problem-solve effectively, and grow as developers.

What's next?

Future Plans	Description
Enhance accessibility with ARIA roles.	Ensuring the platform is usable for all.
Provide transcripts for videos and audios for users with hearing disabilities.	Making content more accessible.
Implement image descriptions for users with visual disabilities.	Enhancing the experience for visually impaired users.

Thank you!
